A system of PVC profiles for windows and doors

The Ideal 70 casement window represents the very best of the 'new generation' of PVC-U window systems and combines stunning good looks with outstanding thermal performance, comforting protection from the weather and state of the art security.

The elegant aesthetics of Ideal 70's ovolo featured profiles provide really good looking windows that will grace and enhance any home and harmonise beautifully with Ideal 70 doors on any elevation.

Ideal 70 casement windows can be made in an almost endless range of shapes and styles and are offered in a stylish white lustre and a choice of beautiful woodgrain effect foiled finishes in sumptuous rosewood or contemporary golden oak.

A choice of elegant handles adds a stylish finishing touch.

Ideal 70 windows and doors also combine to make great conservatories.

A five chamber construction and double pre-applied weatherseals provide complete protection from the elements while also conserving your valuable energy and helping to protect the environment. Your home will feel warmer, quieter and cosy in winter yet airy and bright in summer.

The Ideal 70 casement window is made from highly durable PVC-U that cannot rot or warp and needs only occasional cleaning with a mild soap solution to keep it looking great for years to come. You need never paint a window again!

Multi-point locking systems using the very latest espagnolette and/or shootbolt technology provide a formidable barrier to would-be intruders and internal glazing beads prevent removal of the glass units from the outside. Peak performance combined with complete peace of mind; Ideal 70.
